

In Sink Dry Basket Arrestors®

Arrest the solids at the source using the “New” IN-SINK DBA’s®

The **In-Sink DBA™** range are the most effective products available for the removal of solid waste from waste water in sinks. These products are intended for use in commercial kitchens to screen out and retain solid waste from the waste water.

Large In-Sink Dry Basket Arrestor® products are intended for use in busy kitchens to reduce the frequency of emptying the basket and to eliminate the need for other screening devices in the sink.

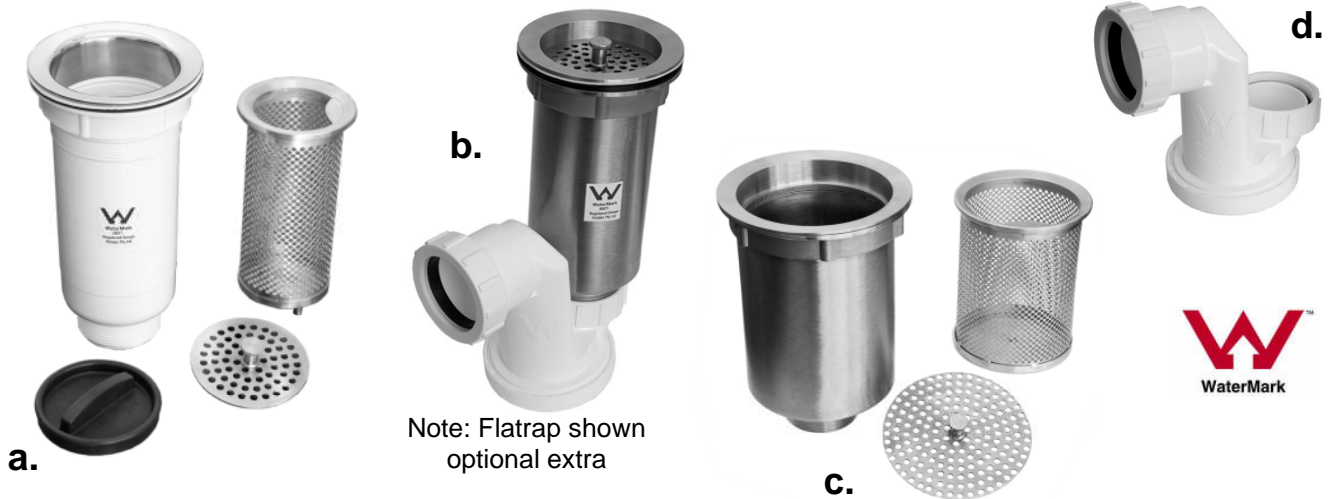

- Fits a 125mm sink outlet hole
- Kitchen staff friendly and easy to use
- Eliminates the need for other sink screening
- Large stainless steel basket
- Easy to lift out and return
- Baskets are easy to empty and clean
- Solid, durable and dependable
- Connects to a standard 50mm water trap
- Watermark and WSAA appraised
