

NATURE'S WATER SECRET ~ ZAZEN LIVING WATER

Scientists studying the health and longevity of many of the world's oldest & healthiest people, discovered the secret lay in the quality of the water they drank every day.

They understood the use of water for its curative power was among the earliest "healing" practices of mankind. Indeed, drinking or bathing in springs, streams, or pools for therapeutic purposes predates recorded history. In various cultures, water has been touted for its healing powers, attributed to its mineral properties, thermal effects, and even supposed supernatural qualities. Legendary "fountains of youth" and reputed miraculous healing shrines like that in Lourdes, France are one example.

What the scientists discovered was that water underwent a transformation as it bubbled and cascaded over mineral rocks in pristine mountain streams and as it gushed from underground streams. They discovered that indeed ~ not all water was the same! That these waters had properties that enhanced life and they called it LIVING WATER ... the water of life.

zazen set out to find water technologies for the home that recreate the same pristine quality for optimum hydration & health in harmony with the body's modern day need.

Today those same scientists have recreated nature's processes to produce zazen LIVING WATER, with the same exceptional qualities so we can help you nurture yourself and your family. We know your body will love you for it!

EXCEPTIONAL VALUE OPTIMUM PERFORMANCE

"It's very important to have a water filter that not only removes the increasing number of harmful water contaminants such as carcinogenic organic compounds, but one that also REPLACES the minerals that we do need. I now have an economically priced system that fits my stringent requirements."

Pauline Roberts PhD., BSc. (Hons), DBM
Naturopath and Scientific Researcher, Liverpool Plains, NSW

zazen LIVING WATER for a wellness generation

Enjoy the essential health benefits of zazen LIVING WATER all day every day

- ✓ **Tastes Great** – everyone loves it, especially kids!
- ✓ **Cleanses** – enabling cells to release toxic waste
- ✓ **Hydrates** – immediately at a cellular level
- ✓ **Nourishes** – with a balanced range of essential minerals
- ✓ **Energises** – full of healthy electrolytes for vitality
- ✓ **Rejuvenates** – reverses aging
- ✓ **Exceptional Quality** – clean and fresh
- ✓ **Alkaline** – in harmony with the body's needs
- ✓ **Antioxidant** – eliminates free radicals
- ✓ **Immune Support** – builds your body's defense system

Totally Natural & Environmentally friendly

"I can really taste the difference between zazen and other water, the girls fill their water bottles each day for school."

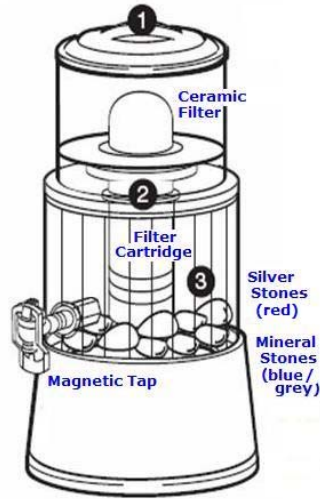

Dr Karen Parker, Breast Physician & Mother of 3 girls

zazen LIVING WATER

for a wellness generation

The zazen Living Water system transforms tap water into water of exceptional quality. Water becomes contaminated in two main forms: bacterial & chemical. zazen Living Water reduces bacteria, volatile organic compounds, lead, cysts, THMs, MTBEs, turbidity, chlorine, bad tastes & odours, then rebalances and remineralises it, delivering the very best drinking water.

“zazen Living Water provides the mineralisation we need, and takes out the toxins we don’t need that weren’t in our water 50 years ago!”

Pauline Roberts PhD., BSc. (Hons), DBM
Naturopath and Scientific Researcher

Being properly hydrated boosts your immune system and helps release toxins.

THE CREATION PROCESS AS SIMPLE AS 1-2-3

1. SIMPLY FILL THE UPPER TANK WITH TAP WATER (4 LITRES).
2. WATER NATURALLY FLOWS THROUGH MULTIPLE LAYERS OF ADVANCED FILTRATION TECHNOLOGIES, EMULATING THE NATURAL CLEANSING PROCESS OF NATURE, INTO THE LOWER TANK (8 LITRES).
3. CLEAN, FRESH WATER SITS IN THE LOWER TANK, WHERE IT PASSES THROUGH NATURAL SILVER & MINERAL STONES & A MAGNETIC FIELD WHICH REMINERALISE & REVITALISE THE WATER, OXYGENATE IT & TRANSFORM IT INTO HIGH ENERGY “LIVING WATER”.

cleanse, hydrate nourish, energise

HOW IT WORKS

STAGE 1 CERAMIC FILTER ~ CLEANING

Water contains organic and inorganic particulates such as soils, sand, rust, bacteria, chemicals and other hazardous micro-organisms,. The zazen ceramic filter is highly effective and removes these to a range of 0.2 to 0.5 microns.

STAGE 2 FILTER CARTRIDGE ~ CLEANING & REBALANCING

The water now passes through an efficient high technology zazen filter with 19 natural raw materials including Activated Carbon, Silver and Copper Zeolite, Ion Exchange Resin and Silver Activated Carbon Bio Balls which reduces impurities such as pesticides, bacteria, THMs, colour, odours, heavy metals, & other chemicals, whilst softening the water and improving its taste and smell. The water is also energised as it passes over ionic and far infrared layers (known for centuries to assist with healing and cleansing of the body) further enhancing the energy and bioavailability properties of the water.

STAGE 3 MINERAL STONES ~ REMINERALISING

The zazen mineral stones contain a broad range of ionized minerals (calcium, magnesium, silicon, iron, potassium, phosphorus, sodium, & others) essential to optimum cellular function, metabolic waste removal and toxin release. They also increase the water pH alkalinity and dissolved available oxygen. Ionized minerals are more readily absorbed into our blood stream and cells. zazen mineral stones are mined 300 to 600 metres beneath the sea ensuring the highest quality.

STAGE 4 SILVER IMPREGNATED STONES ~ PROTECTING

Silver is a natural anti-bacterial agent. Water loses much of its life sustaining properties when it is stagnant. Silver stones naturally preserve the quality & freshness of the water in the zazen tank through this natural, anti-bacterial effect, ensuring the best quality water is ready to drink all day, everyday.

STAGE 5 MAGNETIC TAP ~ RESTRUCTURING

In this final stage we surround the water with magnetic energy (1200 gauss) as it flows through the zazen tap. Magnetised water has a free flowing hexagonal structure in harmony with body fluids as it breaks down the size of the water clusters for faster, immediate absorption. It also helps increase the amount of oxygen (a natural antioxidant) in the water.

PRODUCT INFO

Upper tank capacity 4 litres
Lower tank capacity 8 litres
Magnetic Tap 1200 gauss

Base: 300mm diameter
Height: 500 mm
Weight: 5.3 kg

REPLACEMENT COMPONENTS

For optimal performance replace components as follows:

- Filter cartridge every 6 months
- Ceramic Filter every 12 months
- Silver Stones every 12 months
- Mineral Stones every 5 years

We'll remind you via sms or email when your filters need replacing.

WARRANTY & CARE

90 day money back guarantee
12 months warranty on Magnetic Tap

Refer to Installation Guide for system care instructions.
